**Night Vision**

The Z9157 night vision is equipped with a versatile photography accessory: UV-CUT, designed to help users achieve clear and balanced photos and videos in various lighting conditions. The accessory is manufactured with high-quality silicone and filter glass materials to ensure stable and reliable product quality.

**Product Features:**

**1、 High-Efficiency Exposure Control:**

Utilizes precision-designed filter glass to effectively reduce light transmission, helping users control exposure and ensure photo quality.

**2、 Easy Removal:**

Designed for user-friendly operation, users can easily remove the lens filter to address low-light or no-exposure situations, allowing more light to enter.

**3、 Durable Protection:**

Constructed with a silicone frame for excellent shock resistance and durability, with a surface coated in a dirt-resistant layer to effectively prevent scratching and dirt accumulation.

**Usage Scenarios:**

**Daytime and Nighttime Shooting:**

Whether shooting during the day or at night, the lens filter provides reliable exposure control to ensure clarity and color reproduction in photos.

**Shooting in Strong Light Conditions:**

In strong light conditions, users can use the lens filter to effectively control exposure, preventing photos from being overexposed or underexposed.

The Z9157 night vision devices employ infrared imaging technology, equipped with high-power infrared light, aiming to provide additional illumination support during nighttime. This infrared light can assist users in obtaining clearer vision in dark environments, enhancing their ability to observe targets.

#### Usage Recommendations:

**Long-Distance Observation:** When observing targets at a considerable distance, it is advisable to use the infrared light to obtain a clearer nighttime vision.

#### Key Features:

- 1. High-Power Infrared Light:**  
Capable of generating a powerful infrared beam. The concentration of light varies with the change of observation distance: the closer the distance, the more concentrated the light, resulting in a narrower observation range; the farther the distance, the more dispersed the light, resulting in a wider observation range.
- 2. Long-Distance Illumination:**  
It is recommended to use the infrared light at a distance beyond 50 meters to achieve optimal illumination and night vision experience.

The Z9157 night vision device is equipped with a built-in tactical light, aiming to provide users with a versatile lighting solution. This tactical light not only offers reliable illumination support but also features a special strobe function, usable as a distress signal, providing users with additional safety measures during outdoor adventures and emergency situations.

#### Usage Scenarios:

##### 1、 Outdoor Exploration:

During nighttime outdoor exploration, the tactical light provides users with reliable illumination support, helping them safely navigate through complex terrain.

Additionally, if users encounter emergencies such as getting lost or injured, the flashing mode of the tactical light can be used as a distress signal to attract the attention of nearby personnel and obtain timely assistance.

##### 2、 Emergency Situations:

In the event of accidents, such as getting lost or injured, the flashing mode of the tactical light can be used as a distress signal to attract the attention of nearby personnel and obtain assistance for users. Additionally, the tactical light can also serve as an emergency lighting tool,

#### Key Features:

##### 1、 Multifunctional Lighting:

Our tactical light supports both steady and flashing modes, allowing users to adjust according to their needs to meet the illumination requirements of different scenarios.

##### 2、 Integrated Design:

Our tactical light seamlessly integrates with the night vision device, eliminating the need for additional installation and simplifying operation procedures, thus enhancing the overall portability of the product.

##### 3、 High-Performance Light Source:

Our tactical light adopts high-brightness LED light source, delivering stable and uniform illumination to ensure users have clear visibility during nighttime operations.

##### 4、 Distress Signal Function:

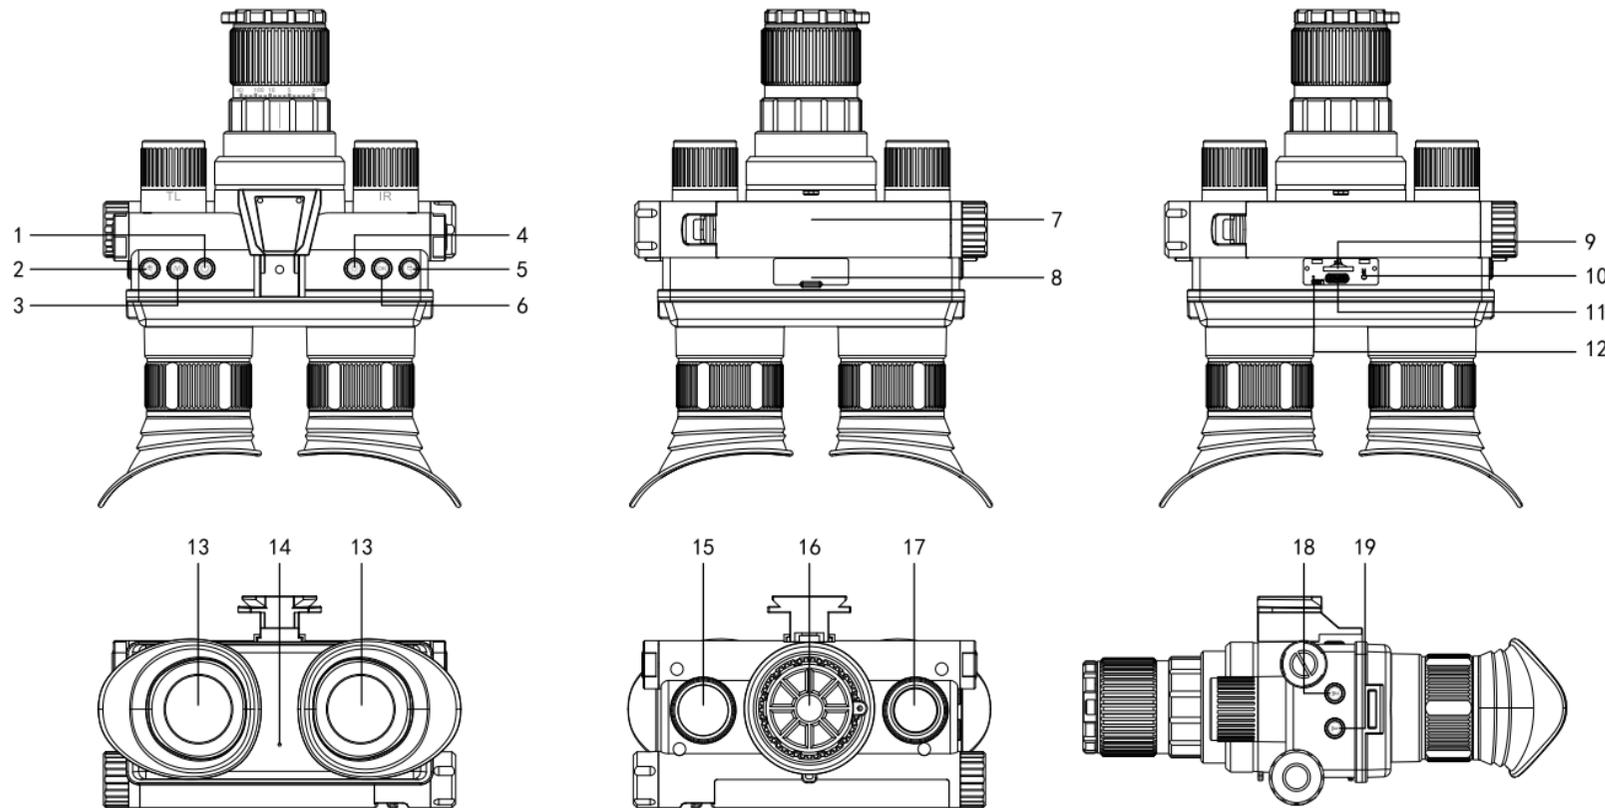

The flashing mode of our tactical light can be used as a distress signal to attract the attention of nearby personnel and obtain assistance during emergencies, providing users with additional safety assurance.

## How to Connect the Device to a Computer via Card Reader or USB Cable

### Card reader

Remove the TF card from the device, then insert it into the card reader. Connect the card reader to the computer via USB.

### USB-C wire

1. Turn off the device, insert the TF card into the device, connect the device to the computer via USB, and then turn it on again.
2. Three options will appear on the screen, indicating that the device is connected to the computer.
3. Select the first option, and the device will enter storage mode.
4. Open "My Computer" or Windows Explorer, open the TF card removable disk.
5. Open the disk and copy files from the storage card to the computer, desktop, or other disk for viewing.

## Precautions

1. When turning on the flashlight, avoid shining it directly into your own eyes or others' eyes.
2. When the flashlight is not in use, promptly turn off the light to avoid excessive discharge and battery damage.
3. Do not apply excessive force to the product; do not clean the product with water or other chemicals, use a soft cloth to clean the product surface.
4. Do not expose the product to direct sunlight or place it in a heated environment; keep it away from high and low-temperature environments.
5. Avoid strong vibrations or impacts on the product; ensure safe placement to prevent accidental touch or falling for children.
6. Do not disassemble the device without authorization; contact the dealer for any questions; improper disassembly will void the warranty.
7. Changes in product performance and functions may occur without prior notice; if there is any inconsistency between the manual and the actual product, rely on the actual product.
8. Do not use the product in areas where the use of electronic devices is prohibited, such as on an airplane.
9. Battery Charging Notes:
  - The product battery uses a polymer lithium battery that can be recharged. Charge the product every 3 months if not in use for a long time.
  - The lithium battery must be replaced by customer service personnel; users cannot replace it themselves (Note: Incorrect battery replacement may cause explosion; only use the same type or equivalent type of battery for replacement); dispose of used batteries to professional organizations for recycling.
  - Charging: Use the included adapter for charging. During charging, the product will warm up, which is normal.
  - Once the indicator light displays cyan, it indicates that the product is fully charged.

## 如何通过读卡器或者USB线将机器连接到电脑（计算机）

### 读卡器

把 TF 卡从机器中取出，然后插入读卡器，将读卡器插入主机连接至电脑（计算机）即可。

### USB-C 线

1. 将机器关机，把TF卡插入机器中，通过 USB-C 线将机器与电脑（计算机）相连接，再次开机。
2. 机器屏幕会出现三个选项，说明已经连接至电脑。
3. 选择第一个选项，机器会进入存储器模式。
4. 打开【我的电脑】或 Windows 资源管理器，打开TF卡可移动磁盘。
5. 打开磁盘，将文件从储存卡拷贝到电脑（计算机）中、桌面或是其他盘中，方可查看。

## 注意事项

1. 开启手电灯光时，请勿将手电灯光照射自己或直射他人的眼睛；
2. 手电不需要时，请及时关闭灯光，以免过度放电，导致电池损坏；
3. 请不要使用过大的力度挤压产品；请不要用水或其它化学试剂清洁产品，请用软布清洁产品表面；
4. 请不要将产品放在直射阳光下或置于火烤环境，请远离高温和低温环境；
5. 请不要剧烈震动或撞击产品；确保本产品放置安全，避免儿童触摸发生意外及跌落；
6. 请勿擅自拆卸本机，否则会失去保修的权利，如有任何疑问请与经销商联系；
7. 因为产品的性能和功能而发生的变化，将不另行通知，如发现说明书与实物不符，请以实物为准；
8. 不要在禁止使用电子设备的地区内使用该产品，比如在飞机上；
9. 电池充电注意事项：
  - 本产品电池采用的是聚合物锂电池,可重复充电使用。
  - 长时间不使用时,请每隔 3 个月为产品充一次电。锂电池须由客服人员更换,用户不可自行更换（注意：如果电池更换不当会有爆炸危险，只能用同样类型或等效类型的电池来更换）；为保护环境，废弃电池请交给专业机构回收处理；
  - 充电：通过本机标配的适配器进行充电,在充电的过程中,产品有一定的升温,属于正常现象；
  - 指示灯显示碧绿色，表示产品已完全充电。
